ENVIRONMENTAL HEALTH INSPECTION
SAWACO WATER DESALINATION, JEDDAH

NIZAR KAMMOURIE,
General Manager
SAWACO Water Desalination
North Obhur
Jeddah
Recipient e-mail: nizarkam@sawaco.com

Saudi Aramco Environmental Protection Department (EPD) conducted environmental health inspections at all three (3) SAWACO Water Desalination Plants located at North Obhur, North Corniche (CROP) and South Jeddah Corniche (SoJeCo), Jeddah, during February 15 and 16, 2017. The objective of the inspection was to assess the facilities against G.I. 0151.006: *Implementing the Saudi Aramco Environmental Health Code (SAEHC)*, and other relevant Saudi Aramco Standards.

Inspection revealed that the overall sanitary conditions of the Desalination Plants were deemed to be **satisfactory**. Additionally, staff were found to be trained on the SAWACO HACCP Plan, dated June 19, 2015 and ISO:9001 Quality Management System dated March 2, 2016 and Certified by SGS.

Therefore, SAWACO will be retained on the list of Saudi Aramco's Approved National Manufacturers and Suppliers.

Should you require further information or assistance, please contact James White on 012-427-0146 or james.white@aramco.com.
