As part of Saudi Aramco Environmental Health monitoring program of Approved National Food & Water Suppliers, Western Region Environmental Unit (WREU) visited your facility at North Obhur, Jeddah on September 12, 2013. The objective of the inspection was to assess the facility against G.I. 0151.006, implementing the Saudi Aramco Sanitary Code (SASC).

Site inspection revealed that the plant is operating to a high standard of Good Manufacturing Practice and Quality Control. Accordingly, WREU is pleased to inform you that your water treatment plant will be retained on the list of Saudi Aramco's Approved National Food & Water Suppliers list for the provision of bulk water to Saudi Aramco.

EPD will continue to arrange visits to SAWACO at North Obhur and Corniche Reverse Osmosis Plant (CROP) at Al-Shate'e district in Jeddah where it is proposed we visit in 2014.

For more information, please do not hesitate to contact James White on 02-427-0146.
